Item/Location/Temp	Cooked Veggies/ Drawer 2/ 34°F
Item/Location/Temp	Pork Belly/ Walk-in cooler/ 40°F
Item/Location/Temp	Consome/ Hot box/ 156°F

SITE CONDITIONS:

Cleanliness:	Clean
Overhead Dangers:	No Issues

EQUIPMENT INSPECTIONS:

Current Work Orders:	Place a work order for the drawer cooler. Even though all items in it are time-marked, we should figure out why it can't maintain temperatures correctly. It may be due for maintenance.

CLOSING COMMENTS:

CLOSING COMMENTS:	A piece of advice to improve the cooling process. Do not cool black beans in a plastic 22-qt container. They are too thick to cool correctly in the walk-in cooler like this. Instead, break it down into the line's portions so we can have them ready and correctly labeled, and we no longer have to keep changing the containers.
