🚨 **BELTLINE CRITICAL:** Ovation Response Time of 98 minutes is the primary score killer — contributing 17/100 on that metric alone. Additionally, Beltline had 8 bad reviews in Wk15 (3.65/100K), up from 2 in Wk14 (0.95/100K). Both issues need immediate GM attention.

⚠️ **3 LOCATIONS WITH 50/100 BAD REVIEW RATE:** Sandy Springs, Cumming, and Decatur. These scores are rolling averages — even though Wk15 showed 0 new bad reviews for these locations, the accumulated rate remains high. Teams must actively drive positive reviews AND respond to all existing negatives.

7.4 min	39.77%	35.87% ⚠️ Slightly up

📈 **Zero bad reviews in Wk15 — clean week!** Great guest satisfaction (4.85 stars, 4.6 Ovation) and fast response times. Duluth's rolling bad review rate (71/100) is the one thing holding it back from the A tier.

🔧 **Priority Fix — Rolling Bad Review Rate (71/100, 1.58% bad):** Duluth went clean in Wk15 which is great. Now actively drive positive Google/Yelp reviews to dilute the historical negatives. Getting below 1.2% bad would push this score into the 92+ range. GM needs a review-driving strategy.

📌 COG ticked up slightly — monitor and ensure ordering/portioning hasn't drifted.

03 · CHAMBLEE 🌟 MOST IMPROVED #7 — 86.51

SUNDAY GLOBAL SCORE	BAD REVIEW RATE	OVATION SATISFACTION

🔧 **Keep pushing on COG (41.2%):** Trending in the right direction but still high. Keep the team focused on portion control and ordering accuracy. Goal: under 37%.

📌 Rolling bad review rate (62/100) will improve as clean weeks stack up. Keep the momentum and drive positive review requests from happy guests.

⚠️ NEEDS IMMEDIATE ATTENTION — B GRADE (80–89)

04 · SANDY SPRINGS #8

85.70

SUNDAY GLOBAL SCORE	BAD REVIEW RATE	OVATION SATISFACTION
97.0	50.0	88.0
★ 4.87 stars ⭐ #2 in system	2.1% rolling · 0 reviews Wk15	4.4 / 5.0

OVATION RESPONSE TIME	LABOR %	COG + OP %
100.0	96.0	84.5
12.37 min	33.97% ✅	41.8% ⚠️

✅ **Sandy Springs has #2 star rating in the system (4.87), excellent labor control (33.97%), and ZERO bad reviews in Wk15.** This location has all the ingredients to be a top-3 performer — the rolling bad review rate is the only thing holding it back.

🔧 **Bad Review Rate (50/100, 2.1% rolling):** Clean week is great progress. Now drive positive reviews aggressively — encourage satisfied guests to post on Google/Yelp. As fresh positive reviews accumulate, this rolling rate will drop and the score will climb. With a clean rate, Sandy Springs is a 92+ location.

📌 COG at 41.8% — work on bringing this under 37%. Labor is already excellent (33.97%).

05 · CUMMING #9 — 85.40

SUNDAY GLOBAL SCORE	BAD REVIEW RATE	OVATION SATISFACTION
100.0	50.0	96.0
★ 4.9 stars 🏆	4.77% rolling · 0 reviews Wk15 ✅	4.8 / 5.0 ⭐ #2 in system

OVATION RESPONSE TIME	LABOR %	COG + OP %
92.8	90.9	84.0
22 min ⚠️	39.13%	42.2% 📈 Improving

⭐ **#2 Ovation Satisfaction in system (4.8/5) and perfect Sunday score (4.9 stars).** Zero bad reviews in Wk15 is great progress. COG trending down. This team genuinely knows hospitality.

🔧 **Rolling Bad Review Rate (50/100, 4.77%):** Worst in system (outside Beltline's Ovation issue). Even with a clean Wk15, the 4.77% rolling rate needs to be diluted. This is urgent. GM must run a positive review campaign: table touches, QR codes for happy guests, follow-up on Ovation 5-star responses. Written plan required.

📌 Ovation Response Time at 22 min — assign a dedicated FOH manager to monitor during service. Goal: under 10 min.

📌 COG still above 42% — keep the downward trend going. Investigate ordering and portion control.

08 · DECATUR #10 — 85.39

SUNDAY GLOBAL SCORE	BAD REVIEW RATE	OVATION SATISFACTION
94.0	50.0	84.0
★ 4.84 stars	2.71% rolling · 1 review Wk15	4.2 / 5.0

OVATION RESPONSE TIME	LABOR %	COG + OP %
100.0	95.6	83.8
10.5 min	34.39% ✅	— ⚠️ Monitor

✅ **Good labor control (34.39%) and reasonable Ovation response time (10.5 min).** The foundation is solid — Decatur just needs to address the review rate and keep COG in check.

🔧 **Bad Review Rate (50/100, 2.71% rolling):** Decatur would be 88+ if this were fixed. 1 bad review in Wk15 — respond within 24 hrs and address root cause. Start driving positive reviews from satisfied guests now.

📌 COG monitoring required — investigate if there was any ordering or waste issue contributing to this metric. Don't let it become a trend.

🚨 CRITICAL — BELOW 80

10 · BELTLINE 🚨 #11 — LAST PLACE

74.63

SUNDAY GLOBAL SCORE	BAD REVIEW RATE	OVATION SATISFACTION
78.0	100.0	72.0
★ 4.68 stars	0.95% rolling · 🚨 8 reviews Wk15	3.6 / 5.0 ⚠️ Near bottom

OVATION RESPONSE TIME	LABOR %	COG + OP %
17.0	91.7	90.1
🚨 98 MINUTES — Critical	38.33%	34.93% ✅ Improving

🚨 **CRITICAL — OVATION RESPONSE TIME: 98 MINUTES (17/100).**
The system standard is under 10 minutes. Beltline is at 98. This one metric is costing ~18 points on the overall score. Fix this and Beltline jumps to 92+.

Immediate required actions:
- Assign a manager to own Ovation monitoring every single service — right now
- Set Ovation alerts on the GM's and all manager's phones today
- Rule: every Ovation alert acknowledged within 5 minutes during service
- GM reports response time daily for the next 2 weeks

🚨 **BAD REVIEW SPIKE — Wk15 vs Wk14:**
Beltline had 8 bad reviews in Wk15 (3.65/100K) vs just 2 reviews in Wk14 (0.95/100K). That's a 4x increase in a single week. This is a separate issue from the Ovation response time — something happened at this location during Week 15. The GM needs to pull ALL 8 reviews, identify the issues, respond to every one within 24 hours, and present a corrective action plan.

✅ **Two genuine positives:** COG improved to 34.93% (one of the better rates in the system) and labor is solid at 38.33%. Beltline is NOT a broken location — it has two specific, fixable operational problems.

🔧 **Ovation Satisfaction at 3.6/5 (72/100):** Near the bottom of the system. Read the actual Ovation comments — what are guests saying? Investigate wait times, food consistency, team attitude, and cleanliness. Schedule a full GM conversation about what's happening on the floor. Fix the Ovation response time first — that alone will improve satisfaction scores as guest issues get addressed in real time.

💡 **Bottom line:** Beltline is a 90+ location with two catastrophic operational failures (98-min Ovation response + 8 bad reviews in one week). Both are completely fixable with an engaged, accountable GM. Target: 88–92 within 3–4 weeks if actions are taken immediately.
