Operations Scorecard — April 2026

Performance Report · All Locations · Updated

Data reflects Week 15 (April 7–13, 2026) · Weeks 16–19 pending

📊 OVERALL RANKINGS — APRIL 2026 (UPDATED)

88.81	95.18	74.79	11
SYSTEM AVERAGE	TOP SCORE (MIDTOWN)	LOWEST SCORE (BELTLINE)	LOCATIONS SCORED

#	LOCATION	SCORE	GRADE	PROGRESS	HIGHLIGHTS / FLAGS
1	**Midtown**	95.18	A		⚡ Best labor % (29.3%) · 0.59 min Ovation response
2	**West Midtown**	95.02	A		⭐ 0 bad reviews · Best COG in system (33.56%)
3	**Sugar Hill**	94.08	A		⭐ Highest stars: 4.94 · 100/100 Sunday score
4	**Buckhead**	92.72	A		✅ 0 bad reviews · Health 80 on record
5	**Lawrenceville**	92.22	A		Solid all-around · COG improved to 36.37%
6	**Duluth**	89.56	B+		⚠️ Bad review rate: 71.0 · COG ticked up to 35.87%
7	**Chamblee**	86.66	B		⚠️ Bad review rate: 62.0 · COG improving: 40.27%
8	**Sandy Springs**	86.48	B		📈 COG improved to 37.16% · Bad review rate still 50.0
9	**Cumming**	85.61	B		⚠️ Bad review 50.0 · COG improving: 40.99%
10	**Decatur**	84.57	B		⚠️ Bad review 50.0 · COG worsened to 41.19%
11	**Beltline**	74.79	D		🚨 Ovation resp: **98 min** · Satisfaction: 3.6/5

🚨 **BELTLINE CRITICAL:** Ovation Response Time of 98 minutes is costing ~18 points alone. Fix this one issue and Beltline jumps to ~92+.

⚠️ **BAD REVIEW ALERT — Sandy Springs, Cumming & Decatur** all scoring 50/100. Pull recent 1-star reviews and confirm teams are responding within 24 hrs.

📈 **MOST IMPROVED THIS UPDATE:** Sandy Springs COG dropped from 41.83% → 37.16% — a significant improvement. Keep the momentum going.

🏆 TOP PERFORMERS — LOCATION DETAIL

01 · MIDTOWN 🏆 #1 — 95.18

SUNDAY GLOBAL SCORE	BAD REVIEW RATE	OVATION SATISFACTION
89.0	99.5	92.0
★ 4.79 stars	1.01% bad	4.6 / 5.0

OVATION RESPONSE TIME	LABOR %	COG + OP %
100.0	100+	89.8
⚡ 0.59 min	29.27% 🏆 Best in system	35.18% ✅ Improved

⭐ **Outstanding — setting the standard for the entire system.** Best labor % of all 11 locations (29.27%) and Ovation response under 1 minute. COG+OP improved this update to 35.18%. This team is running lean, fast, and guest-focused. Recognize the GM and team publicly.

📌 **Keep an eye on:** Stars at 4.79 — still great, but Sugar Hill is at 4.94. A focused guest experience push (table visits, post-meal check-ins) could push Midtown toward 4.9+ and solidify #1 in every category.

02 · WEST MIDTOWN 🏆 #2 — 95.02

SUNDAY GLOBAL SCORE	BAD REVIEW RATE	OVATION SATISFACTION
91.0	100.0	90.0
★ 4.81 stars	0.73% bad ⭐	4.5 / 5.0

OVATION RESPONSE TIME	LABOR %	COG + OP %
100.0	97.7	91.4
1.7 min	32.35%	33.56% 🏆 Best COG

⭐ **Zero bad reviews AND the best COG+OP% in the entire system at 33.56%.** This update shows West Midtown getting even tighter on costs — down from 34.11%. They're delivering perfect guest reputation AND running the most financially efficient operation. This is a complete, top-to-bottom well-run location. Share this GM's approach with the rest of the group.

📌 **Opportunity:** Ovation Satisfaction at 4.5/5 is solid but there's room to push toward 4.7–4.8. With already-great response time (1.7 min), coaching the team on how to recover from negative feedback in-restaurant could improve this score.

06 · SUGAR HILL ⭐ #3

94.08

SUNDAY GLOBAL SCORE	BAD REVIEW RATE	OVATION SATISFACTION
100+	91.5	92.0
★ 4.94 stars 🏆 Best in system	1.17% bad	4.6 / 5.0

OVATION RESPONSE TIME	LABOR %	COG + OP %
100.0	90.5	86.5
5.4 min	39.47%	38.55% 📈 Improved

⭐ **Highest guest star rating in the system at 4.94 — guests absolutely love this place.** COG+OP improved this update from 39.32% → 38.55%, showing the team is starting to tighten up costs while keeping the great guest experience intact.

📌 **Labor & COG still the focus:** Even with improvement, labor (39.47%) and COG (38.55%) remain the highest among the top 5. Keep working with the GM on scheduling efficiency and portion control. The goal is to bring both under 35% without sacrificing what's earning those 4.94 stars.

07 · BUCKHEAD ✅ #4

92.72

SUNDAY GLOBAL SCORE	BAD REVIEW RATE	OVATION SATISFACTION
95.0	100.0	90.0
★ 4.85 stars	0.0% bad ⭐	4.5 / 5.0

OVATION RESPONSE TIME	LABOR %	COG + OP %
100.0	94.9	89.1
6.2 min	35.09%	35.86% ✅ Improved

⭐ **Zero bad reviews, great stars (4.85), and solid financials.** COG improved to 35.86% this update. Buckhead is consistent, reliable, and balanced — the hallmark of a well-managed location. Only location tracking Health Score data (80/100).

📌 **Health score at 80:** Passing, but follow up on specific violations noted during the inspection. Make sure corrective actions are documented and the team is trained before the next visit.

📈 SOLID PERFORMERS — FINE-TUNING NEEDED

09 · LAWRENCEVILLE #5 — 92.22

SUNDAY GLOBAL SCORE	BAD REVIEW RATE	OVATION SATISFACTION
89.0	99.0	84.0
★ 4.79 stars	1.02% bad	4.2 / 5.0

OVATION RESPONSE TIME	LABOR %	COG + OP %
100.0	92.7	88.6
8.1 min	37.31%	36.37% 📈 Improved

✅ **Consistent and reliable — highest volume location in the system and still near-perfect bad review rate (99/100).** COG improved to 36.37% this update. Managing quality at this scale is genuinely impressive. The GM deserves recognition.

📌 **Ovation Satisfaction at 4.2/5** is the focus area. With the volume they push, even small inconsistencies get amplified. Review Ovation comment themes in team huddles — are there recurring issues with wait times or specific menu items? Getting to 4.5 could add 3–4 points to the overall score.

📌 **Labor at 37.31%** — review peak vs. off-peak scheduling to make sure they're not overstaffing slower periods.

11 · DULUTH #6 — 89.56

SUNDAY GLOBAL SCORE	BAD REVIEW RATE	OVATION SATISFACTION
95.0	71.0	92.0
★ 4.85 stars	1.58% bad ⚠️	4.6 / 5.0

OVATION RESPONSE TIME	LABOR %	COG + OP %
100.0	90.2	89.1
7.4 min	39.77%	35.87% ⚠️ Ticked up

✅ **Great guest satisfaction (4.85 stars, 4.6 Ovation) and fast response times.** If the bad review rate were fixed, Duluth would easily be a top-4 location.

🔧 **Priority Fix — Bad Review Rate (71/100):** Pull recent negative Google/Yelp reviews right now — look for patterns in time of day, specific servers, or food complaints. GM needs to respond to all negative reviews within 24 hours AND address root causes. Getting below 1% bad would push the score to 93+.

📌 **COG ticked up this update** from 34.71% → 35.87%. Not alarming yet but worth monitoring — make sure ordering and portioning haven't drifted.

03 · CHAMBLEE #7

86.66

SUNDAY GLOBAL SCORE	BAD REVIEW RATE	OVATION SATISFACTION
91.0	**62.0**	**88.0**
★ 4.81 stars	1.76% bad 🔴	4.4 / 5.0

OVATION RESPONSE TIME	LABOR %	COG + OP %
100.0	**94.2**	**84.7**
4.41 min ✅	35.8%	40.27% 📈 Improving

✅ **Good progress on COG — improved from 41.17% → 40.27%.** Fast Ovation response (4.41 min) and solid labor (35.8%) show operational discipline. This team has the tools to score higher — the bad review rate is the one thing holding them back.

🔧 **Action #1 — Bad Review Rate (62/100, 1.76% bad):** Pull ALL negative reviews from the past 30 days. Look for recurring themes — specific shifts, employees, or food issues. Implement a guest recovery protocol: managers should proactively check on tables that send negative Ovation feedback before they leave.

📌 **Keep pushing on COG:** 40.27% is trending in the right direction — keep the momentum going. Goal is to get under 37%.

⚠️ NEEDS IMMEDIATE ATTENTION

04 · SANDY SPRINGS #8 📈 MOST IMPROVED COG — 86.48

SUNDAY GLOBAL SCORE	BAD REVIEW RATE	OVATION SATISFACTION
97.0	50.0	88.0
★ 4.87 stars ⭐	2.1% bad 🔴	4.4 / 5.0

OVATION RESPONSE TIME	LABOR %	COG + OP %
100.0	96.0	87.8
12.37 min	33.97%	37.16% 🥇 Best improvement

✅ **Biggest COG improvement in this update — from 41.83% → 37.16%.** That's nearly a 5-point drop, and it shows. Sandy Springs also has the 2nd highest guest star rating (4.87) and excellent labor control (33.97%). This location has all the ingredients to be a top-3 performer.

🔧 **Priority — Bad Review Rate (50/100, 2.1% bad):** Fix this and Sandy Springs is a 92+ location. Guests rate 4.87 stars overall but 2.1% leave bad reviews — specific incidents are slipping through. Review the actual negative reviews and look for patterns. Are guests going straight to Google without telling the team? Coach staff on in-the-moment recovery before guests walk out.

05 · CUMMING #9 — 85.61

SUNDAY GLOBAL SCORE	BAD REVIEW RATE	OVATION SATISFACTION
100.0	50.0	96.0
★ 4.9 stars 🏆	4.77% bad 🚨	4.8 / 5.0 ⭐

OVATION RESPONSE TIME	LABOR %	COG + OP %
92.8	90.9	84.0
22.22 min ⚠️	39.13%	40.99% 📈 Improving

⭐ **Best Ovation satisfaction in the system (4.8/5) and near-perfect Sunday score (4.9 stars).** COG is improving — down from 42.23% → 40.99%. The guest experience at Cumming is genuinely exceptional — this team knows hospitality.

🔧 **URGENT — Bad Review Rate (50/100, 4.77% bad):** The worst bad review rate in the system outside Beltline. A 4.77% rate from a location where guests rate 4.8/5 is a major contradiction. The GM must pull every single negative review and read them — are they old and unaddressed? A specific recurring incident? Assign someone to actively encourage happy guests to leave Google reviews to dilute the bad ones. Written action plan required.

🔧 **COG still above 40%** — keep the downward trend going. Also address Ovation response time at 22 min — assign a dedicated FOH manager to monitor during service.

08 · DECATUR #10 ⚠️ COG WORSENED — 84.57

SUNDAY GLOBAL SCORE	BAD REVIEW RATE	OVATION SATISFACTION
94.0	50.0	84.0
★ 4.84 stars	2.71% bad 🔴	4.2 / 5.0

OVATION RESPONSE TIME	LABOR %	COG + OP %
100.0	95.6	83.8
10.46 min	34.39%	41.19% 🔴 Worsened

✅ **Good labor control at 34.39%** and reasonable Ovation response time. The foundation is there — Decatur just needs to address two specific issues.

🔴 **COG WORSENED this update — from 36.29% → 41.19%.** That's a 5-point jump in the wrong direction and a significant red flag. This needs immediate investigation: pull the food cost breakdown by category, check recent invoices for accuracy, and review if there was an ordering or waste issue this week. Do not let this become a trend.

🔧 **Bad Review Rate (50/100, 2.71%):** Decatur's score would be 88+ if both issues were fixed. Train staff on in-the-moment guest recovery — guests are going to Google instead of telling the team. Also encourage happy guests to leave reviews to offset the negatives.

10 · BELTLINE 🚨 LAST PLACE — 74.79

SUNDAY GLOBAL SCORE	BAD REVIEW RATE	OVATION SATISFACTION
78.0	100.0	72.0
★ 4.68 stars	0.95% bad ✅	3.6 / 5.0 ⚠️

OVATION RESPONSE TIME	LABOR %	COG + OP %
17.0	91.7	90.1
🚨 98 MINUTES	38.33%	34.93% ✅ Improved

✅ **Two positives in this update:** Zero bad reviews (100/100 rate) and COG improved to 34.93% — the best it's been. Beltline is NOT a broken location. It has two specific, fixable problems.

🚨 **CRITICAL — Ovation Response Time: 98 MINUTES (17/100).** The system standard is under 10 minutes — Beltline is at 98. This single metric is costing ~18 points on the overall score. Fix this and Beltline jumps to ~92+.

Immediate actions required:
- Assign a specific manager to own Ovation monitoring during every service
- Set up Ovation alerts on the GM's and all manager's phones right now
- Rule: every Ovation alert must be acknowledged within 5 minutes during service
- GM should check response time daily and report back for the next 2 weeks

🔧 **Ovation Satisfaction at 3.6/5 (72/100)** — second-lowest in the system. Read the actual Ovation comments: what are guests saying they're unhappy about? Investigate wait times, food quality consistency, team attitude, and cleanliness. Schedule a full GM conversation about what's happening on the floor.

💡 **Bottom line:** Beltline is a 90+ location that's making one catastrophic operational mistake (ignoring Ovation for 98 min) while also struggling with guest satisfaction. Both are completely fixable. With an accountable, engaged GM, Beltline should reach 88–92 within 3–4 weeks.
